

- Installing
- Protecting
- Maintaining educational workshops

We can offer a full range of workshop services including:

- Electrical and mechanical machine inspection, servicing, refurbishment and repair
- Fitment of new control systems and guarding to existing equipment to bring it up to current H&S standards
- Purchase of surplus or redundant equipment at fair and competitive prices
- 'Source and supply' of quality, new and used machinery and equipment including extraction, work benches and storage
- End-to-end design and installation service for both existing and new-build schools

Did you know...?

Many of the surplus and redundant machines we purchase can be resupplied back to the education sector as a cost effective and environmentally responsible alternative to buying new equipment.

IPM Workshop Services has 25 years' experience in all aspects of educational workshop services including annual electrical and mechanical machine servicing and inspection, machine refurbishment and repair and workshop design, procurement and installation.

We also offer LEV system design, testing and maintenance to meet COSHH requirements.

We undertake work across the whole of the UK and site visits can be arranged to discuss your requirements.
